

Augmented Reality for Common Data Environment (BIMplus)

Setting:

BIMplus is a cloud based BIM Level 3 Building Lifecycle Management Platform (otherwise known as Common Data Environment). It has an open API and thus, provides a very professional BIM development environment. Finally you can do everything with BIM models!

Task:

- Develop a mobile/tablet or HoloLens application that integrates Augmented Reality in the BIMplus platform

Project Characteristics

Modeling: ★★☆☆☆
Mathematics: ★★☆☆☆
Programming: ★★★★★
Science: ★★★☆☆

This project will be supervised in cooperation with ALLPLAN
– a Nemetschek Company.
